ACCESSIBLE SOLUTIONS FOR DRIVERS AND PASSENGERS AND THEIR MOBILITY DEVICES

SHIRLEY ROLIN
Driver Rehab Therapist
GINA LEWIS
Adapt-Solutions

Summary

Accessing the community is an integral part of your client’s mobility. How do you get the wheelchair and user into the vehicle? What products are available? What are some useful evaluation tools? How do I choose the right vehicle? How do I recognize a viable solution? Be involved in an interactive presentation covering aspects of personal mobility from the manufacturer’s and occupational therapist’s perspective.

Learning Objectives

1. Gain an understanding of the process required to prescribe appropriate vehicles and accessible equipment.
2. Identify the options available for accessing vehicles with a mobility device.
3. Distinguish dealers equipped to assist you and your client in finding viable solutions.

Speaker Bio

Shirley Rolin is an occupational therapist and Certified Driver Rehab Specialist (ADED) working in private practice. Her practice focuses on Driver Rehabilitation and Vehicle Modifications for clients with physical, psychological and cognitive deficits.

Gina Lewis is head of business development at Adapt-Solutions, located just outside of beautiful Quebec City. Joining the mobility industry in 2005, Gina Lewis has been active in many industry related activities including serving as the Vice President of the Canadian National Mobility Equipment Dealers Association. Her industry knowledge and ambition are great assets to helping people find the vehicle mobility solutions they are looking for.
