

## **INTRODUCTION TO ELECTRONICS AND MOTORS THEORY - ADVANCED**

*SUNRISE MEDICAL CANADA AND INVACARE CANADA*

### **CSMC TECHNICAL TRAINING CANADA ADVANCED CLASS OUTLINE**

**Intro to Electronics Basics** - This will be an overview of basic electronics, EMF, motors, batteries and joystick principles and is designed for the new tech to learn basic skills

SUNRISE INTRO - This will be a class dedicated to the advanced theory and application of advanced programming.

SUNRISE HANDS ON - This is a hands on application of complex programming for advanced techs with the use of both hand held and PC programming.

INVACARE INTRO - Invacare advanced electronics course will walk through the programming tips and adjustments to make with different specialty electronics

INVACARE HANDS ON - This will be a hands on application of all the theory material that was just covered and will allow advanced tech to program complex rehab seating systems through programmer interface.
